PROFESSIONAL SUMMARY

Software developer and data engineer with 15+ years of experience delivering Oracle-based enterprise applications and database solutions across financial services, insurance, telecommunications, and retail. Experienced in PL/SQL development, data migration, system integration, production support, CI/CD automation, and cross-functional delivery. Recent work includes Sybase-to-Oracle migration, GitHub Actions database deployment automation, and AI-assisted development and testing.

CORE SKILLS

Database & Development: Oracle Database, PL/SQL, SQL, Oracle Forms & Reports, Oracle ADF, Java, Spring Boot, Python, Angular
Integration & Automation: REST/SOAP APIs, Git, GitHub Actions, Bash, SFTP, database CI/CD, data migration
Delivery: SDLC, requirements analysis, database design, UAT, root-cause analysis, L3 production support, Agile, stakeholder collaboration, team leadership

PROFESSIONAL EXPERIENCE

Senior Software Developer | LSEG (London Stock Exchange Group) | May 2023 – May 2026

- Led migration of critical US Profile data services from Sybase to Oracle Database, including Fund Manager, Lipper Indices, Lipper Leaders, and Fund Award datasets.
- Designed Oracle Database CI/CD automation with GitHub Actions and migrated legacy FTP integrations to secure SFTP.
- Used GitHub Copilot and AI-assisted tools for technical analysis, implementation, troubleshooting, and delivery.
- Provided L3 production support, root-cause analysis, and incident resolution for business-critical applications.
- Coordinated BAU delivery with Business Analysts, QA Engineers, and Operations teams in a global financial services environment.

Assistant Manager | Allianz Ayudhya Insurance | Jan 2015 – Apr 2023

- Delivered a Unit Linked platform in collaboration with business stakeholders for insurance and investment products.
- Led implementation of an E-Policy solution, digitizing policy management and improving customer access.
- Managed outsourced policy printing, coordinating vendors and internal teams to support accurate, timely document delivery.
- Implemented Laser ID registration to support SEC compliance and customer identity verification.
- Provided Level 3 support and enhancements for core insurance applications.

Contractor PL/SQL Developer | Advance Info Service PCL. (AIS) | Dec 2012 – Dec 2014

- Designed and implemented data migration processes to load and transform CSV-based data into Oracle Database, improving integration efficiency and data quality.

Oracle Developer | Prima Gold International | Apr 2007 – Nov 2012

- Developed and maintained Oracle Forms & Reports applications supporting POS, CRM, HR, product, and marketing functions.
- Maintained Oracle Database components, reconciled data issues, and built CSV-to-Oracle data migration processes.
- Developed custom Oracle reports and provided branch-office application support and end-user training.
